Gema/Noppel, Auto Powdercoat line No. 1 -

Stocknumber HS 42657.06 9391

Technical information

Extra info

Fully automatet powdercoat line

max workpiece length: 7000 mm

max workpiece width: 800 mm

max workpiece height: 3200 mm

The line consists of:

1 Powder coat booth equipped with 3 robots (= 18 automatic Gema pistols) + 2 manual powder coating pistols (one on each side). Manual powder coating stations equipped with scissorlift.

The control cabinet allows each pistol to be regulated in terms of powder & voltage (0 - 100kV - negative tension). Voltage and excess current can be monitored on a display, the current can be lowered which is useful in case a second coating is needed.

- 2 - A gasoil (can be easily changed to gas) powered oven (indirect heating)
- 3 - Recuperation and filter system
- 4 - chain Power & free conveyor line (about 250 meter for the two powder coating lines, so first buyer has priority)
- 5 - Automatic fire suppression system
